PROSTAX DROP STACKER

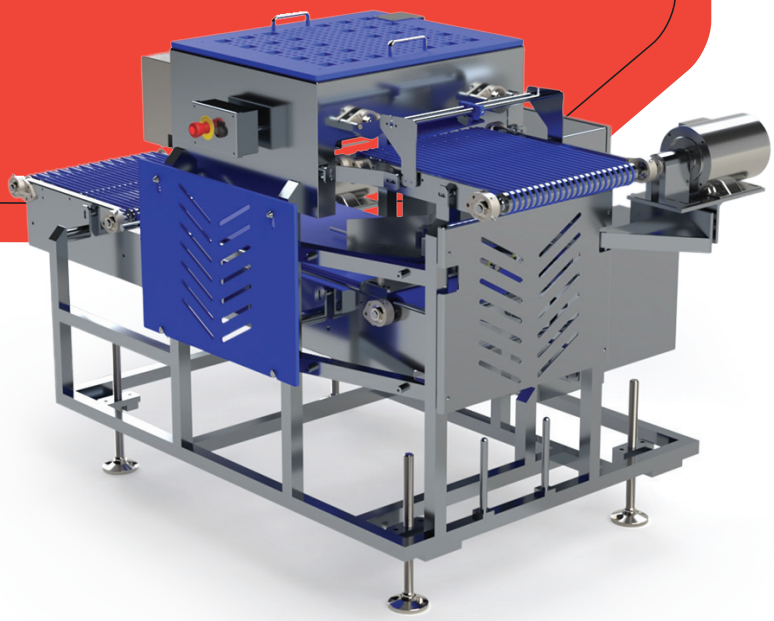
pacproinc
Pacproinc, LLC

Maximize the performance of your packaging process with ProStax® stackers and loaders, the cutting-edge solution for precise counting, stacking, and loading of food products.

The ProStax Drop Stacker, with its modular and compact design, is engineered to interface with our 100 Series ProLeavers. It operates at economy speed, making it the perfect solution for small-scale production lines. With options in multiple widths, this stacker delivers dependable counting and stacking capabilities, loading stacks directly into trays or onto conveyors.

FEATURES

- **Compact, Modular Design:** Fits seamlessly into most food production operations with in-line or 90-degree discharge configurations for flexible layouts.
- **Stainless Steel Construction:** Rugged and durable for long-lasting performance in demanding environments.
- **Hygienic Washdown Design:** Designed for complete washdown capability, ensuring full compliance with sanitation standards.
- **Allen-Bradley® PLC:** Offers advanced control and reliability for precise operation, essential for seamless integration with existing systems.
- **Tray Loading Flexibility:** Capable of loading stacks directly into trays or onto conveyors for gas flush packaging or freezing.
- **Programmable Stack Count:** Allows precise control over stacking operations for consistent results.



Elevate your production with the ProStax - where precision meets versatility.
